PROFESSIONAL SUMMARY

Third-year B.E. student in Artificial Intelligence and Data Science with working knowledge of Python, SQL, and the Python data stack (Pandas, NumPy, Matplotlib, Scikit-learn). Developed MeetMind AI, an offline prototype for speech transcription and local LLM-based summarization. Seeking internship and entry-level opportunities in data and AI.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, SQLite

Data Analysis & Machine Learning: Pandas, NumPy, Matplotlib, Scikit-learn, Data Science Fundamentals, Machine Learning Fundamentals

AI Application Tools: Faster-Whisper, Ollama (Local LLM), Streamlit, FFmpeg

Developer Tools: Git, GitHub, Jupyter Notebook

Web Fundamentals: HTML, CSS

EDUCATION

Bachelor of Engineering (B.E.), Artificial Intelligence and Data Science Expected 2027

SGPA: 9.14 | Class XII: 86% | Class X: 81%

PROJECTS

MeetMind AI | AI-Powered Meeting and Study Intelligence Prototype

Technologies: Python, Streamlit, Faster-Whisper, Ollama, SQLite, FFmpeg

Status: Prototype developed in phases; features described below are implemented, and further enhancements are ongoing.

- Developed an AI-powered meeting and study assistant prototype in phases, using offline processing so audio and transcripts stay on the local machine.
- Implemented live microphone transcription and a recorded-audio transcription workflow using Faster-Whisper speech recognition.
- Used FFmpeg for audio processing within the transcription pipeline.
- Integrated a local LLM through Ollama to generate meeting summaries and extract important key points.
- Added beginner-friendly explanations to simplify complex discussions and study material.
- Built a Streamlit interface with SQLite storage for meeting history and a dashboard of saved meetings.
- Implemented Ask MeetMind, a search feature for querying previously saved meeting content.

PROJECTS (CONTINUED)

Snaxora | Snacks and Wafers Brand Website GitHub

Technologies: HTML, CSS

- Developed a front-end website for a snacks and wafers brand, focusing on product presentation, brand identity, and website structure.
- Published the source code in a public GitHub repository.

TECHNICAL WORK AND PRACTICE

- Completed academic practical exercises in Python programming, SQL databases, and Data Science fundamentals.
- Maintain a public GitHub repository of coding assignments and practice exercises covering HTML, CSS, Python, Git, SQL, and Data Science.
- Use Git and GitHub to version-control and publish project and coursework code.

TARGET ROLES

Data Science Intern | Data Analyst Intern | Python Developer Intern | AI/ML Intern | Junior Data Analyst | Entry-Level AI and Data Science Roles
